

Customer Project Lead (m/f)

Location: Berlin
Start Date: immediately

The company

OpenSynergy GmbH is a fast growing embedded software company based in Berlin. Our core product COQOS is a standards-based software platform that makes it possible to take advantage of open source solutions like Linux and Android in automotive infotainment systems. Using technologies like a certified microkernel and embedded virtualization, COQOS enables the integration of AUTOSAR-based safety-relevant automotive applications and infotainment applications securely on a single chip. We are working together with customers and partners around the globe.

Your task

Our customers using COQOS often require additional services from OpenSynergy. For example: to help them in designing their architecture using COQOS, to port COQOS to their hardware, to support them in using the product or to carry out customer-specific development of software modules. The CPL is responsible for such projects.

- You are responsible for customer-specific projects from start to finish
- As part of your project responsibility you might lead a small to medium-sized team of developers
- In most projects, you will also take over some of the technical work-packages (this can go from consulting work to software development)
- During the project, you are the prime liaison to the customer
- You help in developing the technical aspects of offers for specific customers
- You support our sales team in marketing and selling our product COQOS and our professional services.

We offer

- You will be exposed to some of the most exciting technologies in the embedded domain and address some of the hottest topics in automotive
- You will work in a pleasant, creative, open environment in the "Oberbaum City" located in the center of Berlin
- You can bring in your ideas and expertise to shape the product and the company
- You will interact with interesting co-workers from all over the world
- You will receive a good salary and have a chance to grow within the company.

Our Expectations

- Completed Bachelor's or Master's degree in a technical field
- Broad technical background in relevant software technologies (such as: embedded software, automotive, operating systems, infotainment)
- Experience in managing small to medium-sized technical projects
- Very customer-oriented
- Excellent written and verbal communication skills
- Willing to travel occasionally.

Furthermore technical knowledge about automotive, AUTOSAR, embedded Linux and virtualization technology is of high value.

Please send your complete CV (including a response to the specific job requirements and your salary expectations) to jobs@opensynergy.com.
