Solution Engineer/ Field Application Engineers China (f/m)

Location: **Shanghai**
Start date: **immediately**

Our Company
OpenSynergy works on one of the most fascinating topics in software development: e.g. the integration of Linux or Android solutions with automotive-specific software such as AUTOSAR, the development of the Bluetooth® stack Blue SDK, of an OTA update mechanism and a kit providing high quality of signal processing for hands-free applications in the car.
Our customers include automotive manufacturers and suppliers. That's why COQOS rides along in the car.

OpenSynergy is an independently managed company. Its headquarters are situated in Berlin with locations in Munich and the United States. The company is continuously growing and our corporate culture is inspired by the internationality of our employees, partners and customers.

OpenSynergy is a development member of the AUTOSAR development partnership, member of the GENIVI Alliance, The Linux Foundation and Automotive Grade Linux (AGL). It participates in national and international research projects such as ARAMIS and EURO-MILS.

If you would like to join our team, apply today. We look forward to meeting you.

Responsibilities
Your broad technical expertise will allow you to respond to customers' questions on our products and to develop tailored solutions in close collaboration with the customers and our development team:

- You support the sales team in building the right technical solution and commercial offers on new sales prospects (analyze customer requirements, come up with the right design, breakdown the work in work packages, estimates the effort, prepare the project execution, support RFQ process technically).
- You technically support the sales team in customer meetings – especially with Chinese customers.
- You lead technical workshops/training to build up the required technical know-how.
- You support our product management team to capture customers' needs and help consolidating those into our product portfolio and roadmap.
- You provide technical assistance to our customers during project execution.
- You take the ownership of customer issues reported and follow up problems through to resolution.
- You escalate unresolved issues to the appropriate internal teams.

Your Qualifications

- You have completed a BSc or MS in Computer Science, Electrical Engineering or in a related field
- You have good understanding of CPU virtualization architectures
- You have practical experience with either Intel VT-x or ARM VE, with Intel VT-d or ARM SYSMMU
- You are familiar with operating system kernels (preferably Linux)
- You understand established virtualization frameworks like KVM and virtio
- You have an outgoing and confident personality
- You have the talent to clearly explain and understand complex technical concepts
- You are excited about technology, without losing sight of the global company goals and our customers' needs
- You are fluent in spoken and written Chinese and English
- Experience in the automotive industry is of high value.

We offer:

- a creative working atmosphere with flextime
- a chance to work in Berlin's dynamic district Friedrichshain
- international colleagues and customers
- an opportunity to work with experts in the field of embedded software for cars
- an open-minded and fair working atmosphere.

Please send your complete CV (including a response to the specific job requirements and your salary expectations) to jobs@opensynergy.com.
