OPENSYNERGY

Senior Quality Engineer – Software Audit and Process (f/m)

Location: **Berlin**
Start Date: **immediately**

Our Company

OpenSynergy works on one of the most fascinating topics in software development: e.g. the integration of Linux or Android solutions with automotive-specific software such as AUTOSAR, the development of the Bluetooth® stack Blue SDK, of an OTA update mechanism and a kit providing high quality of signal processing for hands-free applications in the car.
Our customers include automotive manufacturers and suppliers. That's why COQOS rides along in the car.

OpenSynergy is an independently managed company. Its headquarters are situated in Berlin with locations in Munich and the United States. The company is continuously growing and our corporate culture is inspired by the internationality of our employees, partners and customers.

OpenSynergy is a development member of the AUTOSAR development partnership, member of the GENIVI Alliance, The Linux Foundation and Automotive Grade Linux (AGL). It participates in national and international research projects such as ARAMIS and EURO-MILS.

If you would like to join our team, apply today. We look forward to meeting you.

Responsibilities

You will be responsible for the Quality Management and Assurance for our software operations. You will report to Director of Quality and will work closely with executives and technical leads to define and implement strategies to guarantee the quality of our software deliverables. Working with members of the quality group and development teams you will create and deploy processes compliant to automotive standards that are also efficient for project delivery. You need to be a leader with excellent communication skills who challenges the organization to solve critical development problems and cultivate innovative solutions.

Please Note this is not a software test position rather it is for a quality, process and audit professional.

You will take part in projects being involved with all phases of the software development process to ensure the appropriate level of quality. Your responsibility is to work within one or more development teams assisting the team in creating software that adheres to our Quality Management System and is fit for release. You will report directly to the Quality Director and be a member of the Quality and Test team with independent access to the Managing Director and VP Engineering.

Our Expectations

- You have completed a BS or MS in Computer Science, Electrical Engineering or in a related field
- Proven experience creating quality engineering processes with a sound understanding of software development cycles.
- Good knowledge and implementation experience with Automotive SPICE or ISO9001 in successfully passing 3rd party audits
- Experience in quality assessment and auditing within the automotive, mobile, Aerospace or medical industries
- You have a good command of English

Furthermore, experience in the following fields is of high value:

- Development experience with embedded software
- Experience in providing training
- Experience with ISO26262 for functional safety
- Basic German
- You work well within a team and take a creative, hands-on approach to the benefit of those around you

We offer:

- a creative working atmosphere with flextime
- a chance to work in Berlin's dynamic district Friedrichshain
- international colleagues and customers
- an opportunity to work with experts in the field of embedded software for cars
- an open-minded and fair working atmosphere.

Please send your complete CV (including a response to the specific job requirements and your salary expectations) to jobs@opensynergy.com.
