

## Senior Software Engineer – Bluetooth (f/m/d)

**Location:** Berlin, Germany  
**Start Date:** immediately

### Our Company

OpenSynergy works on one of the most fascinating topics in software development: e.g. the integration of Linux or Android solutions with automotive-specific software such as AUTOSAR, the development of the Bluetooth® stack Blue SDK, of an OTA update mechanism and a kit providing high quality of signal processing for hands-free applications in the car. Our customers include automotive manufacturers and suppliers. That's why COQOS rides along in the car.

OpenSynergy is an independently managed company. Its headquarters are situated in Berlin with locations in Munich and the United States. The company is continuously growing and our corporate culture is inspired by the internationality of our employees, partners and customers.

OpenSynergy is a development member of the AUTOSAR development partnership, member of the GENIVI Alliance, The Linux Foundation and Automotive Grade Linux (AGL). It participates in national and international research projects such as ARAMIS and EURO-MILS.

If you would like to join our team, apply today. We look forward to meeting you.

### Responsibilities

1. Initially you will work closely with our teams in both Berlin and in North America as you come up to speed with our product and our way of working.
2. You will take ownership of various aspects of the product developing features, maintaining modules, and working on new products. You will become the domain expert for the areas that you work on.
3. You will regularly interact directly with customers with problems or issues they encounter and periodically on customer specific development projects.
4. You will be involved in all aspects of the product lifecycle from investigations, architecture, design, requirements analysis, development, testing, maintenance, and support. You will directly see your contributions to the team and to the product.

### Our Expectations

We need immediate contributions from you. For this position, we need someone with at least 7 years of relevant experience, excellent C/C++ coding skills and experience in a professional software development environment (with a degree in Computer Science, Electrical/Computer Engineering or in a related field). We need someone who has experience with Bluetooth protocol software and system software development (not just App development) and a variety of systems like Linux, Android, and Windows.

We'll expect that you will be able to learn to work with a variety of programming languages and development tools on Linux, Android, and Windows. It is critical that you have excellent debugging and troubleshooting skills in order to handle the complex problems you will face each day.

We use Scrum for the management of our development activities so you will need to be comfortable working in an environment with iterative development, with high visibility into your work and accountability to the team. We strive for constant improvement and require that you work in a collaborative team environment.

**We offer:**

- a creative working atmosphere with flexitime
- a chance to work in Berlin's dynamic district Friedrichshain
- international colleagues and customers
- an opportunity to work with experts in the field of embedded software for cars
- onsite German language courses
- open-minded and fair working atmosphere
- Benefits for several gyms in Berlin
- Bike Leasing Sponsoring

Please send your complete resume (including a response to the specific job requirements and your salary expectations) to [jobs@opensynergy.com](mailto:jobs@opensynergy.com).
