

Student worker – DevOps & Development Tooling Support Engineer (m/w/d)

Location: Berlin
Start Date: immediately

Das Unternehmen

OpenSynergy is a growing software company based in Berlin. Our core product COQOS is an open software platform that makes it possible to harness the benefits of Linux and Android for in-car infotainment systems. By using microkernel and virtualization technology, COQOS can securely integrate safety-related AUTOSAR-based applications and infotainment applications into a single chip. With our customers and partners we form a network around the world.

Your tasks

Their core task is testing and integrating various development tools for the continuous integration of software Embedded Systems. You sit down with the development testing and IT team to describe your various processes, requirements and use cases. You get Commercial Probe software licenses as well as open source solutions and try the against these use cases you already documented. You present your comparison results as well as your customization suggestions to the different solutions and support the decision making process of the management for choosing a particular solution.

The desired amount of work should be at 20h per week.

Our expectations

- You are a student of computer science, electrical engineering or a similar degree program and have successfully completed your undergraduate studies
- You feel at home in the programming languages C / C ++
- Master professional software development processes and tools for embedded systems
- You master script languages like Python, Ruby, PERL, Groovy, etc.
- You have already worked with Continuous Software Integration
- You've already worked with at least either Automation Tool (Bamboo, Jenkins, etc.) or Static Code Analysis or Unit Testing Tools or Build Tools (make, gradle, ant, etc.)
- You act in a team-oriented manner and enrich your environment through your creative and alert mind
- You have very good spoken and written English skills
- A high level of commitment, flexibility and self-reliance complete your profile.

We offer:

- An innovative, international an open working environment with long-term and diverse perspectives
- Flexible distribution of working time
- Room for creative ideas and impulses
- Talented and motivated colleagues from all over the world
- Flat hierarchies
- Fresh fruits and vegetables
- Sportive company events and a cooperation with the Urban Sports Club
- German- or English Language courses.

Please send your complete application in German or English along with your desired salary to jobs@opensynergy.com.
