

COQOS Cloud

Enabling the Software Defined Vehicle (SDV)

Why COQOS Cloud?

- **Shift-Left** - COQOS Cloud is a SaaS (Software as a Service) creating a virtual development and test environment for Developers to test their Software before the physical Hardware is available
- **Flexible** - COQOS Cloud enables Developers to select and manage Virtual Target Instances on private cloud or on AWS, only paying for the time they use the resources
- **Binary Compatibility**- The use of VIRTIO and COQOS KVM allow VMs to exploit Arm’s ISA binary compatibility on ARMv8 and ARMv9 #onArm
